

RYY (Marietta- Cobb County, Atlanta GA)- based FlightWorks has incorporated into its charter fleet a Gulfstream G450 and a Raytheon Hawker 800XP, which it received “green” earlier this year. FlightWorks President Scott Beale says each of the aircraft had less than 10 hours of flying time when the company received them. In addition, the company expects to open a 40,000 sq ft facility in HEF (Manassas VA) by the end of 2005. That facility will have an executive terminal, passenger lounge, office space and a hanger capable of housing up to 15 aircraft.
