FlightWorks Inc. Registered to ISO 9001:2000

Toronto, ON – Intelex Technologies Inc., a leading provider of quality management solutions, announced that its client, FlightWorks Inc., is now registered to the ISO 9001:2000 quality standard.

Over the past year, FlightWorks has effectively utilized Intelex's Quality, Health and Safety Management System to drive continual improvement throughout its organization. The resulting improvement in quality control, operational procedures, and increased efficiency contributed to the organization's registration to the ISO 9001:2000 standard in March, 2005.

Mark Richardson, Director of Customer Service, FlightWorks Inc., said "It was essential for FlightWorks to have a quality management system to assure that our operations are of the highest possible standard. Achieving registration to ISO 9001:2000 will undoubtedly increase FlightWorks Inc.'s business opportunities. It puts us in a very rare category of aviation companies that have achieved this standard."

Established by the International Organization for Standardization, the ISO 9001:2000 certification for quality system management requires companies to understand customer needs, implement a documented quality system, and deliver products and/or services that meet customer requirements. Strong emphasis is placed on a proactive management team and the continuous, measurable improvement of a well-trained workforce.

"I am extremely proud that FlightWorks has been registered to ISO 9001:2000," said Angela Martin, Business Support Analyst, Intelex Technologies Inc. "Undoubtedly, their commitment and diligence in implementing Intelex's system and making it a part of their daily operations has paid off."

About FlightWorks Inc.: FlightWorks Inc. was founded in 1991, FAA Certified Part 135 in 1994, ISO 9001:2000 certified in 2005 and currently recognized as one of the elite aircraft management companies in the U.S. With a diverse fleet of turbine aircraft under management, FlightWorks' nationwide operations include ground facilities in Atlanta, Georgia, Washington D.C. and Jacksonville, Florida.
