

## Going Rotor. FlightWorks Adds Bell 407 Helicopter to Fleet

### FOR IMMEDIATE RELEASE

July 15, 2006

**ATLANTA (July 15, 2006)** FlightWorks announced today that it has expanded its charter fleet with the addition of a Bell 407 helicopter. The Bell 407 is the 11th aircraft added to FlightWorks' fleet since January 2006.

The Bell 407, known for its sports car-like handling, speed, payload capacity and range, is one of the most versatile

helicopters in its class. The aircraft has exceptional hot and hover capability with unmatched rotor control providing charter customers with a smooth ride and flexible landing options. The spacious Bell 407 seats 5 in a wide body cabin with leather club seating. Generously oversized windows offer excellent visibility. The Bell 407's XM radio also enhances the flight experience.

With interstate and local traffic becoming increasingly more congested, FlightWorks' Bell 407 helicopter provides the commute solution for a growing market of customers with time sensitive travel requirements. Vertical-takeoff capability allows for maximum operation and location flexibility answering the growing demand for 'short haul' air transportation service. The Bell 407 can operate to and from widely dispersed landing ports resulting in easier access and significant trip timesavings. This new aircraft offers competitive rates, low noise and vibration levels, providing exceptional ride qualities.

With a top speed of 157 miles an hour and a 500-mile range, FlightWorks' Southeast serviced Bell 407 makes cross-town hops viable as well as longer-range trips to the South Carolina or Florida coasts. Destinations such as Hilton Head Island or Destin, Florida are just 1 hour 45 minutes from KRYA Atlanta airfield in the Bell. Atlanta to Dalton, Georgia is a quick, 30-minute trip.

"Helicopter charter offers fast, reliable, safe and cost-efficient transportation and aerial business solutions," notes Ron Smith, Vice President of Business Development for FlightWorks. "The operational flexibility of the Bell 407 provides several advantages to business operations requiring aerial land or facilities inspections and overview," Smith said. "Now, more than ever before, time is money and an hour can make or break a deal," he added. "By reducing commute time, bypassing interstate and road traffic, and our customers are now able to maximize their time at the office."

"Not only does the Bell 407 solve travel problems for business executives, it also provides time savings and flexibility for vacationers, hoping to maximize their leisure time and vacations. With the Bell 407, a vast array of beaches, golf courses and spas are more easily accessible," said Cheryl Dornenburg, Marketing Manager for FlightWorks.

### **About FlightWorks**

Founded in 1994, FlightWorks Inc. is recognized as a premier executive aircraft management and charter company providing personal aviation services and solutions.
