

FlightWorks Ranks as Number One Air Charter Company in Atlanta Private jet company has been first for four consecutive years

Atlanta – November 18, 2010 – FlightWorks, the Southeast’s largest on-demand executive air charter and aircraft management company, took the top spot on the Atlanta Business Chronicle’s Atlanta-Area’s Air Charter Company’s ranking list. In fact, the company has held first place since 2006 and been listed in the top 10 for 10 years. The ranking is based on the total number of Atlanta-based aircraft listed on the company’s FAA air carrier certificate, and FlightWorks – with 37 aircraft – outpaces the next competitor by more than 10 aircraft.

FlightWorks provides executive charter services, aircraft management programs, aviation consulting and government aviation support programs in major markets domestically and internationally. Serving corporate executives, business owners, high net-worth individuals and government agencies, FlightWorks specializes in flexible scheduling, uncompromised safety and personalized customer service.

“We are proud to maintain our ranking as the number one air charter company in the Atlanta area for four years in a row,” said Daniel Lucey – president, FlightWorks. “In fact, our fleet continues to expand with new and larger aircraft acquisitions to meet the needs of our growing customer list.”

Business today demands efficiency and private air charter can eliminate long check-in lines, security wait times, mechanical delays and more. As a result, FlightWorks is seeing increased use of private charter as a way to streamline time-consuming commercial travel.

About FlightWorks

FlightWorks operates private executive facilities and business jets in major markets across the United States where it offers on-demand air charter, aircraft management and aviation consulting under Federal Aviation Regulation parts 91, 125 and 135. The company has private executive terminals in Atlanta, Washington, D.C. and Denver, as well as additional charter operations throughout the Southeast, Mid-Atlantic, Central and Western United States, and select international locations. FlightWorks’ fully owned subsidiary, Colorado-based Mountain Aviation, creates a combined fleet of nearly 50 aircraft. FlightWorks holds an Aviation Research Group US (ARG/US) “Platinum” rating, a Wyvern-recommended status and a Department of Defense certification.
